

Pankaj is a Product Designer from the Indian Institute of Science, Bangalore with a bachelor's degree in Mechanical Engineering from NIT Silchar. He has an in-depth experience in the area of product design, development and manufacturing which he gained working with an Indian multinational company designing and developing products, ranging from consumer brown goods to heavy electrical equipment for substations. He believes in the philosophy that design is always from the inside out and anything that is not beautiful on the inside can't truly be called beautiful. Beautiful design works well and looks good doing so. He swears by the motto "Minimum human intervention and maximum human value". During his four year tenure with the Indian multinational company he applied for more than 50 design registrations and 4 collaborative patents. He loves to spend time sketching, playing the guitar and reading..
