

CURRICULUM

The education system is a synthesis of **KG, Nursery** and **Montessori**.

In **Montessori** classes, the aim is to impart education through educative play items. Since it is the first step for the children to interact with each other, different social skills are incorporated by trained teachers. Art activities and play activities are introduced to make the transition of the kids to become socially adept.

Nursery is the first step to learning alphabets and numbers. The expert group of teachers guide the children through different learning methods to start writing the alphabets and numbers and recognising the same. The children are exposed to general knowledge in the form of different aspects of life forms. Art activities and craft ideas are incorporated in the curriculum.

KG is the senior most class in our school. Since Akshara is a feeder school catering to the central board of schools, this class mainly concentrates on syllabus based educational concept with four subjects English, Mathematics, Science and Hindi. The need for education to be fun filled and exciting is always a priority within the frame work of the syllabus based system.
