How was your experience with CST ? Any suggestions in order to guide your juniors ?

CST is one of the best branches in IIT G. I believe it gives many opportunities to explore different areas and excel in them. Keep looking around and decide what interests you the most. Once decided, keep on going IIT will endow you with ample of opportunities.

My experience with research in Chemistry esp. nanotechnology has been great. Some of the research groups are doing a remarkable work in IIT. With research, you can both do travelling and work at the same time if you apply to other universities or foreign institutes. There are many internships, conferences, competitions which you can check out on web. In this area, you don't need to worry about job, getting placed through institute requires mostly 2 months of preparation (for Day 3-7 companies). Apart from this, you can look for off campus opportunities, UPSC openings, GATE or apply for masters. I bet that there will better job prospectus after doing Masters in Chemistry in core jobs than our BTech. So keep exploring and ask your mates or seniors if you have any questions. We are there to help.
