

The Graduate Research Meet is an annual research conference conducted by the Department of Humanities and Social Sciences. It provides a platform for various humanities and social sciences researchers to interact and share their research, initiating a conversation to open up new horizons.

## POWER, MOVEMENT AND MEMORY

While power permeates every facet of human society, it also provides the ground for negotiation. The movement of human and non-human entities (ideas, values, goods, lifeforms and so on), and the production of memories have been a result of, and a challenge to, society's existing power dynamics. Memory, as a mediated outcome of power and movement, holds central agency for revisiting and reconstructing the past and identities. Going beyond disciplinary conventions, this GRM wishes to explore the functioning of power, movements, and memories as mutually distinct issues and/or in connection with each other.

As an interdisciplinary department of the humanities and social sciences, offering opportunities in the disciplines of Economics, English, Linguistics, Philosophy, Psychology, Sociology, History, Archaeology, Political Science, and Development Studies, we invite papers related to, but not limited to, the following sub-themes:

- Migration, Refuge, Diaspora and Syncretism
