

Rules for using the CAD Lab system beyond lab hours

1. Write following information in a text file. Keep the text file on your simulation when you are not in front of your system.

Name:

Roll No.:

email id:

Systems Using (Priority No.) :e.g. B2(1), B4(2), F6(3)

In above example the student is using 3 systems/licenses simultaneously. Priority No. signify the job preference sequence. Among 3 simulations the least important one is associated with higher priority no. This text file should be present in all the systems B2, B4 and F6.

2. If any other interested student come and do not find any available systems/licenses then he can terminate any simulation/code having priority no. greater than 1.

3. Any simulation with priority no. 1 must not be terminated.

4. If there is no such text file on the top of simulation in absence of the user student, the simulation/code can be terminated.
