Guwahati – 781039, India

Subject: Application seeking information under Right to Information Act 2005.

Dear Sir/Madam,

My questions are regarding the Master of Technology (M.Tech) in CSE study program offered by the department of computer science and engineering. Kindly provide answers to the following questions:

1. What are the minimum and maximum durations (in years) of the above-mentioned study program?
2. If the minimum and maximum durations of the above-mentioned study program are different, under what circumstances a student can extend the study beyond the minimum duration of the course?
3. What is the minimum number of courses, in which if a student fails during the above-mentioned study program, gets expelled from the course?
4. If a student fails a course in the study program, is he/she required to take the classes of the same course again in next semesters?

Thank you

Shivam Agarwal
